At WCS Care...

We don't believe your life has to change when you move into a care home. You should be able to carry on doing the things you've always done and have the opportunity to try new things.

With this approach in mind we focus on providing homely environments where freedom, choice and dignity are paramount, stimulation and activity are always on the agenda and staff are available to provide support when needed.

WCS Care has 11 care homes for older people and people living with dementia.

Our newest home, Woodside Care Village, also includes our Deafinitely Independent service for people who are deaf.

Each home has its own personality as well as different facilities. We've provided brief information about each of our homes here, however we know choosing the right home and level of care is an important decision and we encourage you to visit any home you're considering.
